Experience

Freelance Full-Stack Developer & Consultant

Remote · 2015 — Present

› Delivered end-to-end solutions for custom web apps, e-commerce platforms, and internal tools
› Consulted on technical strategy for startups and organizations navigating complex challenges
› Focused on scalable architecture, database optimization, and analytics integration

Senior Director of Technical Operations

Consultant · Remote · 2020 — 2021

› Led a stalled project to beta launch in two months after six months of zero progress
› Managed communication between management and overseas development teams
› Primary liaison for external vendor integrations, including last-minute payment processor switch

Featured Projects

MenuPortal

Founder & Lead Developer · Custom SaaS Platform

React Node Elasticsearch

› Built a platform managing 60M+ menu items from 800K+ restaurants with real-time 8-hour update cycles
› Designed REST API with authentication, quota management, and optimized query handling
› Engineered scalable infrastructure for high-volume storage and rapid retrieval

JoinFlyClub

Lead End-to-End Developer · Nike Incubator

Node Express React Stripe Shopify

› Developed custom e-commerce platform for Nike Incubator with unique commerce workflows
› Integrated advanced analytics tracking customer behaviors across the shopping journey
› Designed scalable backend for high-volume transactions and rapid product updates

Team Rubicon

Developer & Solutions Architect · Custom Shopify App

Node Express React Shopify

› Built custom Shopify app for internal resource allocation and inventory management across regions
› Designed real-time monitoring interface, reducing operational inefficiencies
› Integrated with existing systems supporting global operations
