

SUMMARY

Self-taught full-stack developer with extensive experience in building creating applications, e-commerce platforms, and scalable solutions. Skilled at solving complex problems, delivering high-impact projects within tight deadlines, and effectively communicating with technical and non-technical stakeholders. Proficient in rapid prototyping, full-cycle development, and using analytics to enhance performance.

CORE SKILLS

JavaScript

Node.js

TypeScript

Python

RESTful API

Expressjs

Docker

SQL / noSQL

End-to-End Development

Serverless Architecture

Elasticsearch

Test-Driven Development

Web App Design & Architecture

Authentication & Authorization

Data Security & Protection

Agile/Scrum Methodology

Automation/Scripting

Consulting

Communication

Problem-Solving

PROFESSIONAL EXPERIENCE

Freelance Full-Stack Developer & Consultant

Remote • 2015 - Present

- Delivered end-to-end solutions for custom web applications, e-commerce platforms, and internal tools.
- Consulted on technical strategy, helping startups and organizations overcome complex challenges.
- Special focus on scalable architecture, database optimization, and analytics integration.

Senior Director of Technical Operations - (Consultant)

Remote • 2020 - 2021

- Managed communication between management and the overseas development team, ensuring proper prioritization of tasks and addressing feature requests in alignment with project timelines.
- Successfully led the project to a beta launch within two months, after six months of stalled progress. Improved communication strategies contributed to the rapid completion.
- Worked with management to prioritize features effectively, preventing delays by ensuring essential bugs were addressed before adding new features.
- Acted as the primary liaison between external vendors and the development team, ensuring timely and successful technology integrations, such as a last-minute switch to a new payment processor.

NOTABLE PROJECTS

MenuPortal • Custom SaaS Platform

Founder & Lead Developer • React, Node, Elasticsearch

- Designed and developed a platform managing 60M+ menu items from 800K+ restaurants, with real-time data updates every 8 hours. Built and optimized a REST API with authentication, quota management, and efficient query handling for seamless data access. Engineered scalable infrastructure to support high-volume data storage, rapid retrieval, and robust performance.
- Repurposed the platform into a reliable and versatile API, enabling developers to access detailed restaurant data. Managed all aspects of development and strategy, ensuring adaptability to market needs.

JoinFlyClub • Product Rental E-commerce Platform

Lead End to End Developer • Tools: Node, Express, React, Stripe, EzRentout API, Shopify

- Developed a custom e-commerce platform for the Nike Incubator, tailored to unique commerce workflows.
- Built seamless front-end user experiences, optimizing for performance and intuitive navigation.
- Integrated advanced analytics to track customer behaviors and refine the shopping journey.
- Designed a scalable backend infrastructure to support high-volume transactions and rapid product updates.
- Collaborated with stakeholders to align technical solutions with business goals, ensuring a tailored approach.

Team Rubicon • Custom Shopify App For Internal Use

Shopify Developer & Solutions Architect • Tools: Node, Express, React, Shopify

- Developed a custom Shopify app to streamline internal resource allocation and enhance inventory management across departments and regions.
- Designed a user-friendly interface enabling staff to manage and monitor resource allocation and inventory in real-time, reducing operational inefficiencies.
- Integrated seamlessly with existing systems, ensuring smooth data flow and supporting the organization's global operations.

PORTFOLIO & CASE STUDIES

The link below contains case studies that highlight custom applications I have developed, contract positions I have held, and the innovative solutions I have implemented to address various challenges.
